DRIVE-THRU STOCK LEVEL LIGHT MODEL WS-SLL

INSTALLATION INSTRUCTIONS

NOTE: No tools are required for installation.

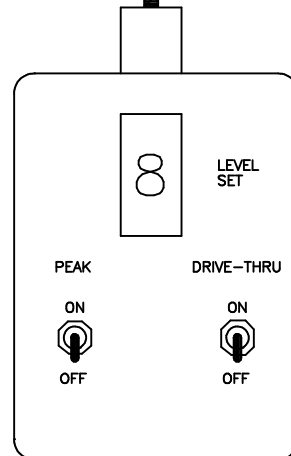

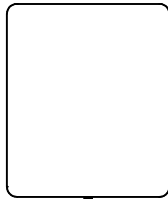

1. Select location for display unit. This is normally in the kitchen area where it will be visible by all kitchen employees. It must be within 6 feet of an outlet.
2. Make sure that the wall where the display unit is to be mounted is clean, dry, and free of grease.
3. Remove protective covering from the front of the display unit.
4. Remove protective covering from the adhesive strips on the back of the display unit, and press the unit firmly onto the clean wall surface.
5. Connect the modular control cable and power cable to the display unit. Plug power transformer into outlet. The unit will beep and the display will begin flashing. Coil any excess power cord and secure it with the black twist tie that came on it.
6. Select the location for the control box. This is normally in the drive-thru area. Remember that the interconnect cable is 40 feet long.
7. Make sure that the wall where the control box is to be mounted is clean, dry, and free of grease.
8. Remove protective covering from the adhesive strips on the back of the control box and press the unit firmly onto the clean wall surface. Connect the modular control cable to the control box.
9. Verify that the unit is operating properly, by selecting each level, peak, and drive-thru. This completes the installation.
